Comments by Oliver Frese, Chief Operating Officer of Koelnmesse, on the occasion of the European Trade Press Conference for ORGATEC 2022

ORGATEC 2022

4 May 2022, 2:00 p.m., Hyatt Hotel, Düsseldorf Medienhafen

ORGATEC 2022

25.10. - 29.10.2022

www.orgatec.com

Ladies and gentlemen,

I too am delighted to be able to welcome you all to our press conference on ORGATEC 2022. The last time we were able to stage ORGATEC in Cologne was in 2018. Almost four years have passed since then.

However, we can't take a look at the coming ORGATEC 2022 without at least looking back over the past 24 months.

There have been a lot of changes over this period of time. And hardly anything has developed as we had hoped it would. The last two years have presented huge problems for many branches of industry. As trade fair organisers, we were faced with very special challenges since we weren't able to stage any physical events for almost two years.

Today, we can say with certainty that the trade fair business will take on a different shape after the pandemic.

But challenges and changes are of course nothing new for a top trading platform like Koelnmesse. Changes are part of the business. And anyone, who wants to be successful, has to be on top of these developments. That is why we have made use of the time to develop new, hybrid formats and digital tools, which can satisfy the constantly changing demands. The speed at which such changes occur has accelerated rapidly over this period of time.

Take the development of digital offers as an example. We were already working on enabling our customers to expand their trade fair success through additional digital offers before the pandemic started.

Yet, today digital and hybrid offers are practically taken for granted on the trade fair scene - even though many industries have only been able to gain very little practical experience to-date.

We had to flexibly keep on reacting to new challenges, plan, change the plans, replan them and then change them again. We have carried out purely digital events,

we have planned and conducted hybrid trade fairs and we have had to continually readapt in line with changed realities and individual industry peculiarities and each time we learned something new!

Page
2/4

Since last autumn and since the beginning of this year we have now been on course for the restart. In the autumn of last year and at the start of this year we demonstrated in the scope of IDS, FSB aquanale, Anuga, ISM/PSC in January as well as at Anuga Foodtec, which closed its doors just a few days ago, that successful international trade fairs are possible again after the pandemic - and also in the age of the current geopolitical occurrences.

We are thus delighted to finally be able to offer our customers the necessary business platforms they are familiar with, namely our trade fairs. This of course also applies for ORGATEC 2022. And in the course of our discussions with those responsible within the companies and with trade visitors from all trades, one thing has repeatedly become evident: The desire to engage in a personal exchange or mutual discussions, to be able to see, touch and try out creative solutions has grown more than ever.

ORGATEC TOKYO, which came to a close a few days ago, is proof that our assumption is correct. Around 22,000 visitors attended the premiere of the event. This success underscores the need for an event dedicated to the design, equipment and technology of modern working worlds.

We are thus looking optimistically ahead to ORGATEC in October and are delighted that with a view to the currently booked exhibition space, regarding the applications from abroad, we have almost reached the excellent level of 2018. Overall, we are expecting around 600 exhibitors from 35 countries in the coming October.

On-site in Cologne, ORGATEC is being staged in Halls 6 to 9 as well as in Halls 10.1 and 10.2.

Regarding the themes ORGATEC 2022 will focus on, these will be examined from a wide range of angles in cooperation with the parties concerned from the fields of science, research and practice.

The focal themes of the coming ORGATEC will without doubt be the latest developments in the area of hybrid and flexible working and the related smart technologies. The initial keywords in this connection are the progressing digitalisation and new technologies for efficient and sustainable building planning.

Of course, new solutions for the equipment of flexible working environments after and during the pandemic also make up part of this, such as the transformation of the office into “collaborative zones”. The ever-increasing demand for sustainable solutions in general and technical solutions and materials that contribute towards climate protection will be further key topics.

ORGATEC is dedicating an own event area called “Materials for future” to the latter.

The exhibition presents sustainable material innovations for the biological cycle and underlines impressively which sustainable solutions for interior construction and design are currently under development or which are almost ready for market launch. Incidentally, in the course of the day we will also be able to experience up-close everything that is already possible today in this connection.

Page
3/4

This brings us to the events that ORGATEC has to offer this year. And these are plentiful: In addition to the “Materials for future”, the iba Conferences, the Investors Day or the PropTech Arena are worth a special mention. They will illustrate the latest technology solutions for the optimisation and increased efficiency of building management. The Fraunhofer Symposium “People in Rooms” and the event zone “Inspired Office” will no doubt also definitely be worth visiting.

Please let me tell you a little more about the latter two, as representative examples for the further events of ORGATEC.

In the scope of the “People in Rooms” Symposium, the Fraunhofer Institute for Building Physics, IBP, has been bringing research and practice, scientists, architects, planners as well as users and companies together for years to inform and discuss with them the interaction between people and rooms. This year, a special edition of the event is being staged at ORGATEC.

The design and effect of working environments gains special significance in a hybrid world of work. Here, the demands of the employees have to be brought into line with the possibilities and the demands of the employers as well as with the framework conditions for work safety and the new legal requirements that are currently emerging. At the same time, modern places of work also have to comply with growing ecological demands - offices and buildings are to be constructed in a sustainable way and all workplaces should be operated as resource-sparingly as possible. The MiR-Symposium 2022 addresses these challenges that arise on designing the new world of work and will provide the latest scientific cognitions, inspiring keynotes and examples of best practice.

At ORGATEC 2018, in the scope of **Inspired Collaboration** we made it possible to experience how technology can inspire the collaboration between people. This year, **Inspired Office** will underline how inspiring worlds of work can be designed through the practical implementation of technology in conjunction with good organisation and office design. Whereby this world is not limited to a concrete place, but actually links up the home office, with work on the road and in the office to form a hybrid “ecosystem”.

The special feature of this event zone is the step from the product presentation of a wide range of technology leaders such as Cisco or Telekom through to the presentation of an integrated overall system. In this way, we make it possible to experience hybrid work in a playful manner and the individual applications and products are expediently integrated into an experiential world for the trade visitors of ORGATEC. Hence, we won't be presenting abstract “future visions” that are nice to look at, but which are not implementable in the near future. No, Inspired Office shows totally concrete work environments, where the technology and equipment are

indeed already connected today in a useful, efficient and creative way.

Page

4/4

As you can see: Once again this year, ORGATEC will emotionally present relevant themes and will provide the industry with new impulses. Because that is what this leading, international trade fair does, as a theme-oriented business event it brings the decision-makers of all sections together and invites them to experience and push forward the development of modern working worlds.

Thank you very much.

Great interest in ORGATEC 2022 from companies all around the world

Almost 400 companies from all around the world have already confirmed their participation /// Top-class event programme will address current industry topics /// Funding programmes for start-ups and SMEs ///

Following the enforced break caused by the pandemic, interest in face-to-face, professional dialogue at the highest international level is very strong. Almost 400 companies from all around the world have already registered for ORGATEC 2022. The number of exhibitors continues to grow steadily, joining brands like Assmann, Brunner, Calligaris, Carpet Concept, Interface, Interstuhl, Kinnarps, Lapalma, Lintex, Muuto, Palmberg, Sedus, Thonet and Waldmann. A regularly updated list of those companies that have registered so far is available now at www.orgatec.com.

Companies interested in exhibiting at ORGATEC 2022 can benefit from the early-bird discount until 31 March 2022. Anyone wishing to take advantage of this offer before it expires can find the necessary documents on the ORGATEC website. The forms can now be completed and sent online, saving the hassle of downloading them.

The great interest shown by companies reveals just how strong the desire is to be able to exchange ideas in person, to have discussions with each other and to see, touch and try out creative solutions. Because one thing is undeniable: our working environments have changed profoundly in recent months - more radically and at a much faster pace than anyone had predicted. Hybrid meetings, working from home, multi-local and virtual working in agile teams have become the "new normal". The new world of work is more diverse than ever - and needs new perspectives. Workplaces must become even more flexible, increasing numbers of people are working in shifting locations - in offices, in hotels, in open workspaces, at home or while travelling by car, plane or train.

Sustainable, smart and flexible - tomorrow's working environments

The upcoming ORGATEC will therefore have a particular focus on the latest developments in relation to hybrid and flexible working. This will also include the associated smart technologies for communication and organisation in modern working environments. Sustainability will also figure prominently in the presentations and discussions in the exhibition halls in October. Alternative and sustainable materials, and topics such as resilience and the circular economy will be

Top-class event programme will address current industry topics

And, as the industry knows to expect from ORGATEC, these topics will be examined from a wide variety of perspectives in the trade fair's event programme in cooperation with participants from the spheres of science, research and real-world practice. For example, the special exhibition area "Materials4Future" will present potential solutions for reducing the carbon footprint of office furnishing products. In collaboration with leading companies from the telecommunications and technology sectors, the topic of smart hybrid office technology will also be highlighted with its own showcase entitled "Inspired Office". Furthermore, ORGATEC 2022, together with the Fraunhofer Institute, will be offering a symposium on the subject of "People in spaces", with the additional option for trade visitors to take part in numerous architect-guided and themed tours. Last but not least, in addition to lectures, congresses and tours, ORGATEC 2022 will for the first time offer innovative companies the opportunity to present new ideas, products and services for the digitalisation of the construction and property sectors in an exchange of ideas with the property industry in the PropTech Arena.

Funding programmes for start-ups and SMEs

To help them exhibit at ORGATEC 2022, start-ups and small and medium-sized companies can access support from the German Federal Ministry for Economic Affairs and Climate Action (BMWK) in the form of a contribution towards their participation costs. It's a win-win situation for all involved. Innovative start-ups and SMEs contribute fresh ideas and new perspectives, playing an important part in shaping the working world of today and tomorrow, while ORGATEC gives them an excellent platform for presenting and successfully marketing their solutions and services to high-quality target groups.

euvend & coffeena 2022 co-located with ORGATEC

As was already planned for 2020, euvend & coffeena will be co-located with ORGATEC 2022 for three days of the trade fair. euvend & coffeena is the leading international trade fair for vending and office coffee service. This is where new work meets new retail. New to-go concepts from the out-of-home sector for the office and contract business will be presented. The co-location of the events opens up new opportunities for ORGATEC visitors in these market segments. ORGATEC tickets give visitors access to the co-located event, thereby further increasing the benefits of attending the trade fair for companies of all sizes and making a visit to Cologne even more efficient.

ORGATEC - New Visions of Work: 25-29 October 2022 in Cologne

ORGATEC is the leading international trade fair for the modern working world. Hosted biannually in Cologne, the trade fair is the most significant international business event for the industry. With a strong focus on topical issues, it serves as a creative hotspot for networking, collaboration and new trends in interior design. As the industry's most important innovation and business platform, ORGATEC showcases the world of work in all its diversity, addresses the latest questions and transforms Cologne into a global gathering place for architects, planners, and industry experts from the manufacturing sector and the trade. The leading international trade fair

for the modern working world presents new visions of work and explores how work environments and work culture interact.

Koelnmesse - industry trade fairs for the interior, outdoor and design sector:

Koelnmesse is the world's top trade fair organiser in the fields of interiors, furnishings, design, home living, garden lifestyle and modern work environments. At the trade fair grounds in Cologne/Germany, the leading international trade fairs imm cologne, LivingKitchen®, spoga+gafa and ORGATEC showcase the latest trends, products and innovations, serving as international, central gatherings for the global industry. In addition to the events at its Cologne headquarters, Koelnmesse is strategically expanding its portfolio internationally: The inaugural ORGATEC TOKYO will be hosted in 2022. It will be the first trade fair in Japan to focus on professional and hybrid work environments. As the satellite event for imm cologne and ORGATEC, idd shanghai provides European companies in the premium and luxury segment of the interior design industry with a unique platform for showcasing exclusive, design-driven products.

The in-person events are complemented by ambista, the online business network for the international interiors industry, which provides direct anywhere, anytime access to relevant products, contacts, expertise and events.

ORGATEC 2022: What kinds of spaces do people need?

The Fraunhofer Institute for Building Physics IBP will hold the sixth People in Spaces symposium at ORGATEC 2022.

For many years, the Fraunhofer Institute for Building Physics IBP has been bringing together the worlds of research and practice, scientists, architects, planners, users and companies to exchange information and discuss the interaction between people and spaces as part of the high-profile People in Spaces (Menschen in Räumen/MiR) symposium. This year, the People in Spaces symposium will be held in Cologne on 26 October at ORGATEC 2022, the international trade fair for the modern working world, and will be a special edition focusing on hybrid, multilocal working environments.

In a hybrid, multilocal world of work, the design and impact of working environments are especially important. Knowledge workers move dynamically between physical and virtual spaces, between offices and home offices, between more private areas and spaces intended for collaboration in their activity-based offices. And the choice of where to work has never been freer, never made more consciously than it is now.

Good spaces must satisfy users' innate needs for freedom from distractions, privacy, creative inspiration and interaction, and must be able to meet increased expectations with regard to flexibility, digital connectivity and safety. Changes to the ways work is organised and space is used have a reciprocal effect and ultimately also influence the demands on the context, such as food services, location, accessibility, land use and, ultimately, neighbourhood and urban development.

In this process, the employees' requirements must be aligned with what employers need and are able to offer as well as with occupational health and safety legislation and the new legal framework now being developed. At the same time, modern workplaces should also meet growing environmental needs - offices and buildings should be constructed in a sustainable manner, and all workplaces should be operated in the most resource-efficient way possible.

The Fraunhofer Institute for Building Physics IBP is devoting itself to these challenges involved in shaping the new world of work in its special edition of the People in Spaces symposium. In addition to the latest scientific findings, inspiring keynote speeches and best-practice examples, the event will feature exciting contributions from the fields of science, architecture and business practice.

Alongside other activities, the **Fraunhofer Institute for Building Physics IBP** researches the effect of spaces on people and supports companies and the public sector in the development and implementation of technical, organisational and behavioural solutions for attractive working environments that promote good health and boost performance. With its Office Initiative, the IBP has created a network that brings together scientists, planners, manufacturers and operators, facilitating and accelerating the transfer of research findings into real-world applications. <https://www.ibp.fraunhofer.de/en/about-us/initiatives/office-initiative.html>

IBP scientists also conduct research into acoustics, lighting, air purification, hygiene and air conditioning in indoor spaces, as well as into sustainable materials, systems and construction methods. <https://www.ibp.fraunhofer.de/en/>

#orgatec

Now more important than ever: ORGATEC 2022 provides insights into the working environments of tomorrow

Our worlds of work have changed more rapidly in the last two years than at almost any other time previously. Working from home and videoconferencing, multilocal and virtual working in agile teams have placed new demands on work environments. Workplaces need to become more flexible and at the same time more sustainable. Key topics at the leading international trade fair in October will therefore include the latest developments in hybrid and flexible working as well as smart technologies and environmentally friendly materials. To give you a foretaste of what lies ahead, we take a look at the current trends and innovations in the office furnishings industry.

As the requirement to work from home comes to an end and staff return to the office, the industry faces new questions. What's attractive about an office when it's generally possible to work from anywhere? What kind of environment do hybrid working models need? Which tools facilitate virtual teamwork? Together with the exhibitors, ORGATEC 2022 from 25 to 29 October will reveal the industry's thoughts about the office environment for the "new normal". Solutions that make the office more attractive for teamwork, the exchange of ideas and social interaction are now high on the agenda. Instead of rigid workstations, spaces are being created that support new, creative ways of working. But what do such workplaces look like?

Forever flexible: shaping spaces with interior design

Today's offices are an ever-changing landscape of spaces, people and relationships. In line with the concept of colourful diversity over dull, uniform grey surroundings, employees prefer unique and adaptable office environments. The key to agile teamwork in the face of changing requirements is flexibility. With this goal in mind, several companies scheduled to exhibit at ORGATEC 2022 offer a wide variety of modular solutions for dividing spaces into zones. One example is the Node+ system from La Cividina, designed by Ben van Berkel. It comprises a series of upholstered parts, backrests, partition walls and accessories that can be combined in multiple ways in order to create spaces for work, relaxation, privacy or socialising. With RB and Clamp, the furniture brands Mobel Linea and Palmberg are also presenting new ranges for configuring office spaces. They respond to changing requirements by using modular elements to divide a wide variety of workspaces into zones.

Versatile all-rounders: multipurpose furniture

Today, even individual pieces of office furniture are increasingly multiflexible and multifunctional. Recent examples include the Fundamentals cabinet system from

Lande or the benches and stools in the 4SIX collection from SMV, which can be rearranged quickly and in many different ways. The models in the new Pontis Hypa range from ASSMANN Büromöbel, on the other hand, can be used as desks, seminar tables or bistro tables. Thanks to their rechargeable batteries, the tables are height-adjustable and their tabletops can be positioned vertically to serve as whiteboards. Thanks to magnetic supports, the Stay Agile whiteboards from Swiss manufacturer Adeco are as flexible as their name suggests and can even be used as meeting tables. The new, multifunctional Slide table system designed by the kaschkasch design studio for Renz is equally versatile - available in various heights, infinitely adjustable and mobile thanks to castors. The Mudra universal stacking chair, developed by Brunner in collaboration with designer Stefan Diez for offices, cafeterias or private homes, boasts a similar range of uses.

Naturally sustainable: eco-friendly materials

The climate crisis remains one of the greatest challenges of our time and is playing an increasingly important role in new developments in the office industry. Younger professionals in particular are striving to live sustainably, cycling to the office, buying local products or eating a vegan diet. And the working environment should reflect this attitude, too. Manufacturers are therefore increasingly focusing on recycling as well as environmentally friendly and certified materials. For example, the new Green Eco chair, designed by Javier Mariscal and available from Spanish brand Mobles 114, is made entirely from recycled material and is itself also fully recyclable. The refined and understated Arco collection of seating furniture from Cantarutti and the new Lina chair from Calligaris have received awards for their use of FSC®-certified wood. Although still a vision of the future, Palmberg has designed a desk that is made entirely of locally sourced organic wood and feeds solar energy and the waste heat generated by equipment (back) into the electrical ecosystem in the workplace.

Circular models: cradle-to-cradle in the office

Many office manufacturers have committed to basing their product cycles on the cradle-to-cradle principle, marking a further decisive step towards sustainability. More and more companies are seeking certification to confirm their switch to eco-friendly production models. The new Lino range of chairs from Kinnarps, for example, conforms to the circular economy idea. It comprises only a few components, which can be easily disassembled, replaced, separated and recycled. The A22 stackable barstool, designed by Swedish designer Anya Sebton for Lammhults, is based on a similar concept. To facilitate recycling, it is made entirely of steel and has no bolts or screws. The yarn and felt backing used for the new Shadowplay carpets by Ege Carpets have also been recycled and can be reused.

Green working environment: taking inspiration from nature

Well-being is a key theme in today's office concepts, and studies show that green plants and other natural features can be particularly beneficial. The trend towards biophilic design is therefore set to continue. Factors such as natural light, vegetation or naturalistic design offer a contrast to technology and the hectic pace of urban life. Plants can also significantly improve indoor air quality. So why not integrate greenery directly into office furniture? Room dividers like Para Vert from Brunner bring vertical planting into the workplace, act as indoor air purifiers and

can be extended as required. New colour collections for the office, such as Pigment from Alvic or Cinque Terre Colours & Natural from Fantoni, which are inspired by colours from the natural world, also convey a sense of being close to nature.

Page
3/5

Cosy office furniture: the new at-home feeling

Even before the pandemic, work was already increasingly freeing itself from fixed locations. This trend has also blurred the boundaries between design for the office and the home. While homes have become offices, offices are visibly transforming into home-like feel-good zones. Soft shapes and warm colours define the new welcoming culture in the world of work. Furniture ranges like HomeLine from OKA combine office functions with homely design. The latest seating furniture - such as the ingLife office chair from Japanese manufacturer Kokuyo, the Alex lounge chair from BOS Barcelona or the Pottolo chair from French label Alki - also introduces a touch of cosy comfort into the office environment. With their elegant styling, these pieces are suitable for both work and home. Fun and playful designs, such as the brightly coloured octopus-shaped Medusa stools from Dileoffice or the Pony chair-and-table combination from gumpo also promise to liven up office work. Even company bosses avoid hard edges these days. Recent executive collections like Blade X from Alea feature soft, dynamic lines and welcoming wood tones.

Office design for the home

Working from home has gained new momentum as a result of the pandemic. As a long-term solution, it's an important issue - not only for companies but also in terms of product developments. Manufacturers such as Alea, Humanscale and Wiesner-Hager have developed special furniture ranges for remote workers that meet ergonomic requirements as well as the need to fit into a home environment. As an alternative to the kitchen table, height-adjustable sit-stand solutions such as the Gravit iDesk from Kesseböhmer introduce ergonomics and individuality to working from home. The tabletop can be personalised with bespoke motifs. Models like Poppe Swifel from Bla Station or Woom Light from Klöber are functional items of office furniture and comfortable armchairs at the same time, making them suitable for sitting for extended periods in home offices. Woom Light features a moulded non-woven seat shell made from recycled PET bottles and an integrated reading light that creates an extra-cosy ambience. The Souly office chair from Nowy Styl, designed by Oscar Buffon, is another sustainable seating solution, the individual elements of which can be flexibly replaced.

Audible well-being: improving room acoustics

The more open and agile the office environment, the greater the need for products aimed at optimising acoustics. That's why companies like Strähle offer customers the option to preview spatial acoustics by entering their own room data. Room-in-room systems, such as the extended Se:cube Max from Sedus, are suitable solutions for existing structures and are both acoustically and visually attractive. Inspired by Japanese interiors, the Zen Pod from Abstracta also creates acoustically shielded spaces that can be used for digital meetings, quiet conversations and work requiring full concentration. The Flexia lamp from Artemide also takes its inspiration from Japan, and its origami-influenced design absorbs sound from its surroundings. Solutions like Silento Screen from the Lanab Group, which can be set up quickly to create meeting zones or individual workstations in open-plan offices, are designed

to help people focus in a busy environment. More compact options include seating modules like Mute Focus from Swedish manufacturer Horreds and the upholstered Buddyhub unit from Pedrali, both of which provide small acoustic islands that allow users to concentrate on work in open office landscapes.

Healthier workplaces: ergonomic and antiviral products

Health has been a hot topic in the office industry for quite some time now. The pandemic has given the issue even greater prominence and added additional considerations. Alongside ergonomics and physical and mental fitness, hygiene matters are now increasingly finding their way into office design. The spectrum of current solutions ranges from ergonomic furniture for the workplace to room ventilators and antiviral surfaces. A healthy posture is supported by products like the fully upholstered Wave chair from Köhl, which has ergonomic properties that contribute towards healthy sitting and is available in a creative diversity of colours and designs. The Novus Clu monitor arm from Novus with light gas-spring technology is another recent example of optimised workplace ergonomics. The lamps from Italian manufacturer Artemide featuring Integralis® technology also promote good health when it comes to desk-based work by disinfecting the surfaces they illuminate.

When the office furnishings industry finally meets again in person at ORGATEC in October, the innovations on display will not only serve to illustrate the rapid pace of change in the world of work. They will also show the ongoing progression towards healthy, sustainable and intelligently organised office environments. In addition to innovative solutions and products to satisfy the requirements of a “new normal”, the leading international trade fair will once again focus on the latest trends with an extensive event programme - and the industry has rarely been more excited to discover new ideas and inspiration for the future of work than it is right now.

Koelnmesse - industry trade fairs for the interior, outdoor and design sector:

Koelnmesse is the world's top trade fair organiser in the fields of interiors, furnishings, design, home living, garden lifestyle and modern work environments. At the trade fair grounds in Cologne/Germany, the leading international trade fairs imm cologne, LivingKitchen®, spoga+gafa and ORGATEC showcase the latest trends, products and innovations, serving as international, central gatherings for the global industry. In addition to the events at its Cologne headquarters, Koelnmesse is strategically expanding its portfolio internationally: The inaugural ORGATEC TOKYO will be hosted in 2022. It will be the first trade fair in Japan to focus on professional and hybrid work environments. As the satellite event for imm cologne and ORGATEC, idd shanghai provides European companies in the premium and luxury segment of the interior design industry with a unique platform for showcasing exclusive, design-driven products.

The in-person events are complemented by ambista, the online business network for the international interiors industry, which provides direct anywhere, anytime access to relevant products, contacts, expertise and events.

German office furniture manufacturers look ahead to

ORGATEC 2022:

short-term challenges, huge long-term opportunities

The Interior Business Association (IBA) reports a further rise in sales at the start of the year / Impact of the Russian war of aggression against Ukraine unforeseeable / High expectations for ORGATEC 2022

Wiesbaden, 4 May 2022 – At the European trade press conference for ORGATEC 2022 in Düsseldorf on 4 May 2022, the Interior Business Association (Industrieverband Büro und Arbeitswelt e.V. [IBA]) gave some initial insights into its members' expectations for the current year. In the first quarter of 2022, manufacturers of office and contract furniture based in Germany reported an increase in sales of 9.2 per cent compared to the corresponding period in the previous year. The roughly 90 industrial companies among the IBA's members closed the previous year with a rise of 5.7 per cent, thereby partially compensating for the fall in sales in the first year of the coronavirus pandemic (-11.8 per cent). The ongoing price rises in supply markets and the uncertain impact of the war in Ukraine are causes for concern.

Contract business driving increased demand in all segments

After a prolonged period of low demand during the pandemic years 2020 and 2021, the market already began to pick up noticeably at the end of 2021. This upturn was fuelled by the resumption of extensive new office fit-outs in the first months of the current year, as can be seen from the demand for office seating furniture as well as for desks, room dividers and storage furniture. Sales of office

seating furniture rose by 6.9 per cent, while other types of office furniture saw an average increase of 11.3 per cent.

Export sales rose by 8.5 per cent compared to the previous year. Domestic growth stood at 9.4 per cent. The share of exports stabilised at 26.0 per cent, returning to the level seen before the outbreak of the coronavirus pandemic.

Condemnation of the Russian war of aggression against Ukraine

Figures are not yet currently available for sales in April 2022. In the association's offices in Wiesbaden, however, the industry experts assume that the growth course that the industry had embarked upon will slow down as a result of the Russian war of aggression against Ukraine. Sales are accordingly expected to be lower than the outlook initially indicated at the start of the year. In response to the general uncertainty of the current situation, manufacturers of office and contract furniture are currently basing their planning on various scenarios. These range from a slight increase by the end of 2022 to a considerable fall in sales. The continually rising prices for raw materials and energy are currently the main cause of problems for manufacturers. By contrast, they have largely been able to compensate for bottlenecks in materials supplies by adjusting their procurement policies. Regardless of these issues and the as-yet-unknown impact on their own situation, the IBA and its members stand unreservedly behind the sanctions imposed on Russia by the German Federal Government, the European Union and their NATO partners.

Positive outlook and high expectations for ORGATEC 2022

While the industry is readying itself for further challenges in the short term, the IBA's members expect to see considerable sales increases in the long run. Implementing hybrid work models requires almost all companies to make at least partial adjustments to the existing workspaces in their offices. Home offices also still have

room for improvement. Organisational development, employer branding and needs-based workspace design will be closely linked to each other in the future. Industry insiders therefore see this year's edition of ORGATEC as ideally timed despite the global political environment. "Without any doubt, ORGATEC 2022 is set to be the richest in terms of its content since the launch of the event format," said Hendrik Hund, Vice President of the IBA, at the European trade press conference for ORGATEC, hosted by Koelnmesse. "After all, many questions relating to hybrid working still remain open. Moreover, new uncertainties are constantly emerging in the industrialised world and evolving extremely dynamically. All this means that companies must show that they care for their employees in a new way." Against this backdrop, exhibitors want to use ORGATEC as a platform to showcase solutions and concepts, while also taking advantage of the opportunities for further discussions with industry peers at the event.

HPP Architects is one of Europe's leading architectural partnerships with a full range of architectural and master planning services. Since its foundation by Professor Hentrich, the 4th generation of HPP partnership today includes a global team of more than 25 nationalities and 450 architects, engineers, urban designers and specialists. Today it comprises 13 offices including 8 regional offices in Germany and 5 international branches in Turkey, China and Netherlands.

HPP Architects' headquarter is located in the Düsseldorf Media Harbor, further offices are located in Amsterdam, Beijing, Berlin, Cologne, Frankfurt, Hamburg, Istanbul, Leipzig, Munich, Shanghai, Shenzhen and Stuttgart.

HPP completed more than 1200 buildings worldwide and aspires to create architectural quality of lasting value beyond the here and now: timeless and yet clearly part of their time, innovative and equally grounded in history. We specialize in the design of corporate headquarters and campus, sports facilities, education and culture, refurbishment and listed building projects. HPP ranks as one of the 25 largest architectural offices worldwide and the second-largest in Germany.

Among the most famous projects in the company's history are the Dreischeibenhaus, the Vodafone Campus and the L'Oréal Germany Headquarter in Düsseldorf as well as the University of Applied Sciences in Mülheim. Most recently, the Europa-Park Stadium Freiburg, the SVW Technical Center and the SAIC Motor Pudong Arena in Shanghai or the Maslak Square and the mixed-use quarter AND Pastel Istanbul were completed. The mixed-use quarter FOUR Frankfurt, realised jointly with UNStudio, the Alibaba Campus in Hangzhou as well as the vertical campus Eclipse and the C2C-inspired timber hybrid office building The Cradle in Düsseldorf are among the projects currently in realisation.

Antonino Vultaggio

Dipl.-Ing. Architect

Senior Partner HPP Architekten GmbH

12 years at HPP

Antonino Vultaggio was born in Offenbach in 1972. After his studies in Frankfurt a.M. he worked in the office of KSP Jürgen Engel Architects where he began as project architect and became vice head of design in 2007. In 2010 he came to HPP where he managed the attendance in design competitions as Head of Design. Antonino Vultaggio is project partner since 2012, partner since 2018 and was appointed to the circle of shareholders as senior partner of HPP Architekten GmbH in 2021. He is committed to all topics related to the sustainable transformation at HPP and among others is responsible for the C2C-inspired timber hybrid office building 'The Cradle' in Düsseldorf or the field of sports buildings with projects like the Europa-Park Stadium in Freiburg.

Vultaggio is a member of the chamber of Architects and Town Planners in Hessen, Germany.

Düsseldorf's first office building in timber hybrid construction is inspired by the Cradle-to-Cradle® principle. With its futuristic sustainability concept and striking architecture, the building stands for innovation, openness, and a new perception of architecture. By thinking circular equal consideration is given to economic, ecological, and social aspects – along the entire value chain and the entire life cycle. The integral facade combines a variety of functions, gives visual expression to the C2C principle, and creates a distinctive building with an identity for the place. The climate-friendly and health-promoting timber hybrid construction generates a positive ecological footprint with added value for users and the environment. In the sense of 'circular economy', The Cradle understands itself as a material depot: all construction materials used have been selected for their material health, single origin and separability, are documented in a Building Material Passport via the 3D BIM model and registered on the Madaster platform.

Sustainability:
DGNB Gold

Office environments are currently undergoing a phase of accelerated change, which brings enormous challenges for many companies. The new headquarters of HPP in Düsseldorf's Medienhafen offers solutions to the challenges of our time. More space, the alternation of areas for retreat and meeting points, and the office as a place of well-being – these are the aspects that define our working environments.

HPP's new office environments are situated in the mixed-use property "H27", comprising offices, micro-apartments, gastronomy areas and event spaces. The clear, solid architecture echoes the contours of the neighbouring building and defines the various functional components with sculptural recesses, niches and alcoves.

Vending and OCS industry coming together in October at euvend & coffeena 2022

+++ Companies from 10 countries have already confirmed their participation +++ Synergy effects: euvend & coffeena taking place parallel to the most important international, leading trade fair for modern working worlds +++ Themes worlds as creative forms of presentation for companies +++

Around seven months before euvend & coffeena 2022 opens in Cologne, the vending and OCS industries are facing great challenges: Because the current forecasts assume that employees will carry on working from their home office at least one or two days a week even after the Corona pandemic and will thus only be partially present at the office. This means in future vending offers will have to be much more flexibly aligned to suit the changing demand than hitherto. Here, automated solutions offer enhancing, innovative concepts for the round-the-clock provision of employees. It is therefore not surprising that numerous companies from ten countries spanning all exhibition segments have already confirmed their participation at the International Trade Fair for Vending & Office Coffee Service.

The fact that both the German Vending Association e.V. (BDV) and the European Vending & Coffee Service Association (EVA) are inviting their members to join them in Cologne for official association meetings underlines the industry's high interest in euvend & coffeena 2022. For example, the BDV is holding its annual general meeting at the trade fair for the first time and the EVA is also staging its yearly assembly meeting at the trade fair in October.

euvend & coffeena 2022 co-located with ORGATEC

This year euvend & coffeena is being staged parallel to ORGATEC, the most important trade fair for modern working worlds, for the first time. This will make it easier for new visitor target groups such as architects and planners, the real estate industry, facility managers, contract caterers, the furnishers and equippers of gastronomy establishments or decision-makers from the office and hotel industry to attend the trade fair. This offers the exhibiting companies the opportunity to penetrate new and growing sales markets. The offer of targeted, thematic visitor guided tours for these visitor target groups to euvend & coffeena is to further reinforce this effect and additionally underline the networking character of the trade fair.

New: Theme worlds give a creative insight into the offer of the industries

To accentuate this aspect to the visitor target groups, euvend & coffeena 2022 is presenting four attractive theme worlds for the first time, which the participating

companies can take part. They are positioned around the lecture area of euvend & coffeena and have a central location in the exhibition hall. These comprise of the "Office Coffee Bar", where coffee systems, coffee roasting companies, filling products, cups & equipment as well as card reading or payment systems will be on display. The trade visitors can among others learn news about micro markets, vending machines, coffee concepts or returnable systems in the "Canteen & Meal Solutions" section. Current 24/7 store concepts, machines for snacks/food, cold beverages and non-food as well as payment and coin systems are grouped under the term "Public Space". And last, but not least, the theme world "Meet the Operator" showcases everything to do with technology, service & convenience and demonstrates what distinguishes vending services in a nutshell.

Page

Companies that would like to exhibit in one of the theme worlds can still do so. The layout planning of the trade fair starts now.

Koelnmesse - industry trade fairs for the food and beverage sector: Koelnmesse is an international leader in organising trade fairs in the food and beverage segment. Events such as Anuga and ISM are established, world-leading trade fairs, hosted in Cologne/Germany. Anuga HORIZON in 2022 will mark the launch of an additional event format dedicated to food industry innovations in Cologne. In addition to the events at its Cologne headquarters, Koelnmesse also stages numerous food trade fairs with different sector-specific areas of focus and content in further key markets across the world, including Brazil, China, India, Japan, Columbia, Thailand and the United Arab Emirates. These global activities enable Koelnmesse to offer its customers bespoke events and leading regional trade fairs in a variety of markets, thus creating the foundation for sustainable international business. Koelnmesse is also ideally positioned in the field of food technology with its leading international trade fairs Anuga FoodTec and ProSweets Cologne and its global network of satellite events.

No. 4 / 29. April 2022, Tokyo, Japan

AROUND 22,000 VISITORS AS ORGATEC TOKYO 2022 SHOWCASES THE FUTURE OF HYBRID WORK

- *The inaugural ORGATEC TOKYO was a resounding success, with 21,958 visitors gathered to see the latest trends in hybrid workplace design and furniture*
- *The show made it clear that there is a lot of potential for growth in the Asian workspace industry*
- *ORGATEC TOKYO 2022 featured over 80 leading global brands from 8 countries.*

Tokyo, Japan, 28 April 2022- The 1st edition of ORGATEC TOKYO has drawn to a close, having recorded 21,958 visits over three days. The event took place from 26-28 April at Tokyo Big Sight, Hall 1-2, underscored the need for an event dedicated to workspace design, furniture, and technology in Asia. Attendees witnessed first-hand how companies in Asia are adapting to changing workplace needs concerning the rise of hybrid work arrangements.

The **Best Presentation Awards** winners were announced on 26 April, with the Grand Prix award going to KOKUYO for their imaginative, colorful, neon display inspired by roller coasters, merry-go-rounds, and Ferris wheels. This new office theme has a playful twist on the traditional work environment, making them stand out in the showground. Semi-Grand Prix awards were also given out to CASSINA IXC., Otsu, and Tesera. *"On seeing the high level of booths at the event, I felt my heart racing at an experience I had not had for some time. Of the ten nominated companies, Kokuyo received the grand prize in support of its passionate energy for change."* shared Ryuko Kida, ELLE DECOR Branding Director, Hearst Digital Japan Co., Ltd. who was sitting on the judging panel with leading Japanese architect, Sosuke Fujimoto, and Mazda's Head of Global Design, Ikuo Maeda, *"I hope we can all celebrate the start of ORGATEC TOKYO together. And I am looking forward to next time, when we will have even more participants. I hope to see you all again!"*.

Under the overarching theme of "Creative Creation", the **Seminar Sessions** delivered thought-provoking talks that explored "The Rise of Hybrid Work". In the opening keynote speech, Sosuke Fujimoto deep dived into the blend of factors that make up hybrid spaces, such as occupation, location and values. Other highlight includes a panel session which invited industry figureheads such as Kazuhiko Nakama, Keisuke Toyoda, and Daito Manabe to give the community insights on the rising metaverse workplace and best practices to enhance collaboration within the digital offices.

"ORGATEC TOKYO is a new type of branding platform that combines beautiful and functional office furniture, workplace design that assumes the well-being of workers, and solutions to the challenges of hybrid work at a high level." said Makoto Takagi, Managing Director of Koelnmesse Japan.

He continued, *"Even though the digital transformation develops, the fact that inspirations and creativity can be more generated from the direct perceptions with five human senses has reaffirmed the importance of physical meeting points."*

Page

2/3

Exhibitor Talks covered more technical topics such as redefining what a corporate office in the city should be; using iwasemi an acoustic metamaterial to solve the problem of reverberant sound that accompanies the enclosed space; suitable environments for biophilic design; hybrid work with telepresence avatar robots; sustainable facilities management; as well as creating a future workplace with evolution thinking.

The installations at **Xperience Area (XA)** have been designed to make visitors feel like they are inside an actual 'Athletics', 'Avatar' and 'Biophilic' area--all highlighting ways that businesses can achieve these at their workplace. Platinum Sponsor, Masayuki Nakamura, Representative Director, President and CEO of OKAMURA CORPORATION shared, *"Companies are just now beginning to explore new ways of working after COVID-19. Thus it is of significance that we present practical solutions for companies to adopt creative and highly productive hybrid working styles-- which is the theme of ORGATEC TOKYO."*

"ORGATEC TOKYO was founded with the desire to set new impulses to hybrid work in the post-pandemic era, starting from Tokyo to Asia and the rest of the world." said Akihiro Kuroda, Chairman, Japan Office and Institutional Furniture Association, *"This year, due to the COVID-19, we could not invite international visitors to Tokyo. However, we are looking forward to preparing a unique exhibition space for the international professionals within the workspace industry next year!"*

The next ORGATEC TOKYO will take place from 26-28 April 2023. For more information on the event, visit www.orgatec-tokyo.com.

ORGATEC TOKYO 2022 in figures: 63 exhibitors from 8 countries took part in ORGATEC TOKYO 2022 on exhibition space covering 10,000 m². These included 47 exhibitors from Japan and 16 exhibitors from abroad. The share of foreign exhibitors was 25 percent. 21,958 visitors attended ORGATEC TOKYO 2022.

- end -

ORGATEC - New visions of work

ORGATEC is the leading international trade fair for the modern working world. Every two years, the fair in Cologne is the creative hotspot of networking, collaboration and new trends in office space planning. As the industry's most important innovation and business platform, ORGATEC presents the whole world of work, tackles the big questions and presents new solutions: from furnishing to flooring, acoustics and lighting to media and data processing. ORGATEC makes Cologne the global meeting place for architects, planners and engineers as well as sector experts from industry and trade. The fair explores how work environments and work culture interact and presents new visions of work.

The next ORGATEC is scheduled to take place from 25 to 29 October 2022.
