

No. 3 / June 2023, Cologne #anugafoodtec

The new digital magazine of Anuga FoodTec goes to press

News, insights, interviews +++ the main focus of the first issue is "Responsibility", the key theme of Anuga FoodTec 2024

The digital magazine of Anuga FoodTec is online! From the end of June onwards, the new content platform offers news, insights, trend reports, interviews and background information on current themes of the foodtec industry. Once a month, new specialised contents with new focal points will be published. The focus lies on the main exhibition sections of the trade fair - Automation & Digitalization, Processing, Packaging, Environment & Energy, Safety & Analytics, Intralogistics - as well as on the key theme of Anuga FoodTec 2024 "Responsibility". The first two issues of the digital "Anuga FoodTec Magazine" are particularly dedicated to the latter topic.

The new digital magazine can be found on the https://www.anugafoodtec.com/magazine/

The digital magazine is produced jointly by Koelnmesse as the organiser of Anuga FoodTec and by the DLG (German Agricultural Society) as its technical and industry sponsor.

The trade fair's aim behind the "Anuga FoodTec Magazine" is to offer all industry players a unique and specialised information hub, which regularly reports on new approaches, innovations and trends in the supplier sector for the food and beverage industry. Different formats such as interviews, videos, specialised texts, data and facts provide insights into companies and the work of research institutes. The "Anuga FoodTec Magazine" has set itself the goal of promoting the exchange of information and knowledge and thus the continual dialogue within the industry until the trade fair starts and beyond.

The signs are already very good that there will be a high number of exhibitors in all segments at Anuga FoodTec. The event programme comprising of lectures and panel discussions is also taking on shape. One of the key questions of the event programme will be: How should food production be aligned across the supply chain to ensure a sustainable change of our food system and global food security in future?

Anuga FoodTec is unique with its approach across processes and industries. It covers all aspects of the production of food and beverage production - from process technology, as well as filling and packaging technology through food safety and packaging to digitalisation and intralogistics. Environmental technology and energy will be integrated into the trade fair as a new exhibition area.
